ORIGINAL CARTRIDGE

Hoof Tite Original Cartridge is used to adhere wooden or rubber blocks to the claw of a bovine hoof to relieve pressure on the opposite claw. Hoof Tite is a two-part urethane, fast-setting adhesive. Features a dual chamber sets in 30 seconds, and saves time and money with an innovative, no-mixing system. Available in a case of 12, Green Mixing Tips available in 100ct bags.

Original Glue: **HT- B001** | *Green Tips:* **HT-B006**

MAXMIX BLOCK ADHESIVE

MaxMix Adhesive is a patented technology blocking system requires no cutting, no spare parts and no extra steps. The MaxMix system is our world-famous adhesive that is fast setting and bonds wood, rubber and plastic blocks to the bovine hoof. With the strongest adhesive that sets within thirty seconds and secures a block in two minutes. Block more cows in less time with less waste with the easy to use snap on tips. MaxMix is guaranteed to save time and money. Available in a case of 12, yellow snap on tips 100ct bags.

MaxMix: **HT- B0011** | *MaxMix Tips:* **HT-B0033**

COLD WEATHER ADHESIVE

HOOF TITE cold weather adhesive is formulated to set the fastest in the colder climates. Similar to our original, our cold weather is a thicker formula and sets up in thirty seconds forming a strong bond for blocking. Making it quick and easy to block cattle during the cold seasons. Cold Weather Adhesive is available in our original cartridges in a case of 12 and green mixing tips 100ct.

Cold Weather: **HT- B001W** | *Green Tips:* **HT-B006**

APPLICATION TOOL

This state-of-the-art applicator tool makes using the fast-setting adhesive quick and easy by allowing for precise application onto hoof blocks. This design will allow cartridge to quickly lock into place to prevent it from falling out. Made of durable metal will insure longer use of applicator tool. This works with all of our adhesives and others on the market.

Application Tool: **HT- B002**

SAFE BLOCK – RUBBER

The rubber Safe Block are made with a proprietary rubber blend to provide unparalleled cow comfort with a flexible and anti-slip material for ultimate traction on wet surfaces. Rubber Safe Blocks are available in a case of fifty.

Rubber Block: **HT-SBRNG-50**

SAFE BLOCK – FIRM

The firm blocks are made of rubber and plastic composite which adds durability, slight flexibility, and lasts longer than the flexible blocks, yet they are softer than the wood. Available in a case of fifty.

Firm Block: **HT-SBFXL-50**

SAFE BLOCK – WOOD

These hoof blocks are made from durable hardwood from the mahogany breed. It is used to shift weight off lame of infected hoofs, allowing cows to heal faster and walk with better mobility. Anti-Slip design and cost effective. Available in four size to accommodate any size hoof: Small 200pk, Medium 200pk, Large 100/200pk, XL 100pk.

Small: **HT-SBSM58-2** | *Medium:* **HT-SBMD34-2** | *Large:* **HT-SBLG78-2**
XL: **HT-SBXL78-1**
